**Decoding India's Unicorn which is Copied by Other Countries** Sankalp Awasthi, 2024-01-16 Amidst a sea of literature focusing on startups and CEOs, a conspicuous scarcity of detailed case studies exists. This book endeavors to rectify this by providing a fresh perspective. It chronicles how Ritesh Agarwal and his 'oyo-preneurs' guided their company to unicorn status and delves into their resilience during the challenging COVID-19 lockdown, exploring both survival and resurgence. Beyond unicorn achievement, the narrative unveils the intricate tales behind Oyo's controversies. It's crucial to clarify that a lack of execution knowledge doesn't denote ineptitude. Tailored for aspiring entrepreneurs, the book serves as a guide, empowering them to overcome challenges and succeed in the competitive race. Meticulously crafted, it incorporates valuable information and insightful advice, enabling startup founders to commence their extraordinary journeys without relying on foolproof actions. This case study stands as the most straightforward resource, offering unparalleled insights for those aspiring to join the ranks of startup founders, whether on their bookshelves or through social media platforms.

**KILLER INSTINCT** JAGENDRA RANA, 2023-02-08 Killer instinct is an aggressive tenacious urge for domination in a struggle to attain a set goal. If you say that a sports player or politician has the killer instinct, you admire him for his toughness and determination to succeed. We don't strive to go the extra mile, which is the toughest in any endeavour. We should not create an impression that there's nothing more to achieve. Complacency and overconfidence are proven recipes for disaster. Winning isn't about finishing in first place. It isn't about beating the others. It is about overcoming yourself, overcoming your body, your limitations, and your fears. Winning means surpassing yourself and turning your dreams into

reality. Success is an excellent acquired quality of a person to sustain a strong spirit which can willfully overpower the dictums of mind

*The Ailing India* Colonel Y Udaya Chandar,2016-09-23 Congratulations. By around 2025 India will be the most populous country in the world surpassing China. But unfortunately, India is afflicted with some of the worst circumstances a country can face like a large number of farmers committing suicide, rampant poverty, unmatched corruption, a huge illiterate population, massive unemployment, thousands of un-electrified villages, lack of toilets and sanitation, millions of malnourished children and grave human trafficking of girls and women to outside countries and these prove that all is not well with the country. Any number of data drawn from the utmost reliable sources put India in a bad light. India is the home for one-third of the world's poorest population. More than 60 crore Indians defecate in the open as per the government's own revelation. The book relies heavily on the data provided by UNO and the Indian government. The country is hiding its face like an ostrich to two realities, namely, population explosion and corruption which have placed the country on the path of disaster. The policy makers are concerned with their own well-being and the elected representatives with their own five-year term. The country is drifting into an unknown realm of catastrophe. After reading the book you have to decide whether the country is sick or healthy. If you find the country sick please suggest how to redeem the country. It is your turn now to speak. Can you do anything for India? Read on.....

**CUTOFF BOOKLET OF ENGINEERING COLLEGES IN MAHARASHTRA** Dr. Vilas Deoatre,Dr. Shekhar Rahane,Prof. Harshal Chaudhari,Prof. Mahesh Godse,2024-06-06 This book can be a useful resource for understanding the admissions cutoffs, for engineering programs of various colleges all over Maharashtra. Many times, it is observed that, during admission process, students having good percentile in MHT- CET exam are unable to get good college and branch as per their percentile due to unproper listing of colleges in option form filling round. So, we should Keep in mind that admission cutoffs can vary significantly from one institution to another and may change from year to year, so it's essential to consult the most recent and accurate information available. Though college website and admissions offices are valuable sources for up-to-date admission requirements and cut-offs, but it is difficult to search all information at one place. So, this book is aimed to provide such an information at one place and in simple and understandable format to both students and parents. Authors are always welcome to any suggestions from readers of this book for further improvement and authentication.

**The Digitalization Conundrum in India** Keshab Das,Bhabani Shankar Prasad Mishra,Madhabananda Das,2021-03-01 This book examines the nature, extent and implications of rapid strides digitalization has made in India since the turn of the millennium. These have been examined not merely in the sphere of information and communication technology (ICT) but its multifarious applications spreading across almost all aspects of production, services and institutions which have profound repercussions for the transformation of the society and economy at the micro, meso and macro levels. With contributions from both ICT scholars and social scientists, this book presents diverse scenarios and unravels challenges faced in the process of technical applications, access by the users of these disruptive technologies (automation, e-commerce, big data analytics & algorithms, artificial intelligence, cloud computing, etc.) which, unlike heavy machines (embodied technology), mostly defy physical space, pace of mobility and inoperability between technologies. Chapters in this volume address challenges and possibilities in establishing and operating intricate engineering infrastructure, technical and societal constraints encountered in broad-basing digitalization across layers of educational and social skills conducive to difficult geographies. Issues dealt within this book include farming, healthcare, education, food processing, e-commerce, labour, rural community development, open source data and information democracy. The chapters also reflect upon implications on local economy and society, of the very global nature of these seamless technologies where inter-operability remains the

quintessential advantage of digitalization whether promoted or spearheaded through the state, private sector or global capital. The book critiques policy inadequacies and suggests plausible policy approaches to reduce the adverse impacts of fast digitalization and broad-base potential benefits across space and levels of socio-economic development of regions and society. This book would be of interest to scholars, practitioners, technocrats, industry analysts, policy makers and civil society agencies.

**Economics of Engineering Education in India** Jandhyala B. G. Tilak, 2023-08-28 This volume focuses on the key trends and major developments in engineering education in India and reflects on the effects and challenges of its expansion on economic growth and development. Analysing several dimensions relating to the status and growth of engineering education, this book: Highlights, in the overall policy environment, the rapid growth of engineering education, imbalances in the growth between different branches of engineering education, changing trends and patterns in their growth, quality of education, gender inequality, and inequality by caste, region and economic status and labour market conditions that influence the demand for engineering education Reflects on the rapid growth of private sector in engineering education and its effects on equitable access, quality and other dimensions of higher education, and on overall development of the economy Investigates the socio-economic characteristics of the students going to private colleges/universities, financing by the government vis-à-vis students/households, the unsteady growth in public financing of engineering education and educational loans as a method of financing Explores the reasons behind the increasing demand of engineering education and the factors that have contributed to the rise of electronics engineering, computer science engineering and information technology-related areas of engineering as against some conventionally popular disciplines of engineering This volume will be of interest to students, teachers and researchers of education, higher education, engineering education, economics of education, sociology of education, and education and public policy. It will also be useful for policymakers and administrators in higher education, engineering/technical education in BRIC countries, and those interested in the study and growth of engineering education in advanced as well as emerging economies.

**CONCEPTS OF EDUCATION** Dr. Dilip A. Ode, Jigesh D. Chauhan, Aashka R. Sharma, 2021-01-01

*OUTCOME-BASED CURRICULUM IN ENGINEERING EDUCATION* EARNEST, JOSHUA, GUPTA, SHASHI KANT, 2021-11-02 Engineering Education has emerged as a fast developing 'discipline' in itself with universities across the world opening up exclusive 'Departments of Engineering Education' which is also impacting the socio-economic system in India. Most of the engineering institutions in India are part of the 'hub-and-spoke' university education system unique to India. Scientifically developing the 'Outcome-based Curriculum' (OBC) uniformly across India has been a daunting task, due to the dearth of an authentic book on OBC addressing the need of the Indian Engineering Education System. This being the first book of its kind in India and with OBC serving as the 'Constitution' of 'Outcome-based Education' (OBE), it will go a long way to address this need. The unique feature of this book is that it is replete with examples to explain the various concepts of planning, designing and implementing the OBC in engineering institutions. Different aspects of Outcome-based Teaching Learning (OBTL) and Outcome-based Assessment (OBA) are also discussed vividly. Apart from the examples weaved into the lucidly written seven chapters, additional examples and important formats are provided in the 'Annexures'; another unique feature of this book. Every engineering UG, PG, or Diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there. **TARGET AUDIENCE** • Technical Instruction • Technical Teacher Trainers • Curriculum Specialists/Instructional Designers • Education Policy Makers What the reviewers' say The technical education has to adopt Outcome-Based Curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing OBC. The book reflects the expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of OBC for various technical education programmes. Such a book will serve as a reference for future generations to avoid 're-inventing the wheel again and again. —Dr. M.P. Poonia, Vice-Chairman, AICTE National Institute of Technical Teacher Training and Research (NITTTR) Bhopal has been spearheading different forms of OBC for the last five decades in which the authors have contributed substantially. Care has been taken such that this book will not only benefit the Indian engineering education system, but also the engineering teaching fraternity at the international context.—Dr. C. Thangaraj, Director, NITTTR Bhopal

civilizations and festivities craft India Incredible. Recent years have witnessed the educational scene, especially the higher education sector in the State undergoing a sea change in respect of quality, diversity and accessibility in tune with the global trends. Kerala's surge in the educational front is to be viewed in the backdrop of the country's great legacy in education. India has been a major seat of learning for thousands of years. The country was home to Takshashila, the first university in the world and Aryabhata, the inventor of the digit Zero. In fact, education in Kerala has now become more value added and affordable, thanks to the pro-active initiatives of the State Government and active involvement of the private sector. Moreover, in the higher education market, Kerala has a significant edge in respect of cost which means that there would be growing influx of candidates into the state from outside the state for better and affordable professional education in the days to come. With the most sought after professionals and excellent network of institutes Kerala is becoming the very preferred educational destination in the world. And, we are equipped for you with some elucidations which step-up her significance in the educational map. In Campus Plus, we propose some valuable information along with a number of educational institutes in the State which will be useful for the students and parents in the higher education scenario.
