The Unfinished Atomic Bomb David Lowe, Cassandra Atherton, Alyson Miller, 2017-12-26 In its diversity of perspectives, *The Unfinished Atomic Bomb: Shadows and Reflections* is testament to the ways in which contemplations of the A-bomb are endlessly shifting, rarely fixed on the same point or perspective. The compilation of this book is significant in this regard, offering Japanese, American, Australian, and European perspectives. In doing so, the essays here represent a complex series of interpretations of the bombing of Hiroshima, and its implications both for history, and for the present day. From Kuznick's extensive biographical account of the Hiroshima bomb pilot, Paul Tibbets, and contentious questions about the moral and strategic efficacy of dropping the A-bomb and how that has resonated through time, to Jacobs' reflections on the different ways in which Hiroshima and its memorialization are experienced today, each chapter considers how this moment in time emerges, persistently, in public and cultural consciousness. The discussions here are often difficult, sometimes controversial, and at times oppositional, reflecting the characteristics of A-bomb scholarship more broadly. The aim is to explore the various ways in which Hiroshima is remembered, but also to consider the ongoing legacy and impact of atomic warfare, the reverberations of which remain powerfully felt.

**Miscellany Poems** Anne Kingsmill Finch, 2008-11 Anne Finch (nee Kingsmill), Countess of Winchilsea (1661-1720), was one of the first female English poets to be published. She was well educated as her family believed in good education for girls as well as for boys. Today, some consider her to be England's best female poet prior to the nineteenth century. While Finch also authored fables and plays, today she is best known for her poetry: lyric poetry, odes, love poetry and prose poetry. Later literary critics recognized the diversity of her poetic output as well as its personal and intimate style. Her works include:

Miscellany Poems: On Several Occasions (1713) and Aristomenes; or, The Royal Shepherd (1713).

*The Ascetic Imperative in Culture and Criticism* Geoffrey Galt Harpham, 1992-02-15 In this bold interdisciplinary work, Geoffrey Galt Harpham argues that asceticism has played a major role in shaping Western ideas of the body, writing, ethics, and aesthetics. He suggests that we consider the ascetic as the 'cultural' element in culture, and presents a close analysis of works by Athanasius, Augustine, Matthias, Grünewald, Nietzsche, Foucault, and other thinkers as proof of the extent of asceticism's resources. Harpham demonstrates the usefulness of his findings by deriving from asceticism a discourse of resistance, a code of interpretation ultimately more generous and humane than those currently available to us.

*Leaves of Grass* Walt Whitman, 1872

*When We Say 'Hiroshima'* Sadako Kurihara, 1999 Compelling poetry that constitutes a major legacy of the nuclear age  
*The Journal of Asian Studies*, 1995

*The Speculative Turn* Levi Bryant, Levi R. Bryant, Nick Srnicek, Graham Harman, 2011 Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy. Among the current giants of this generation, this new focus takes numerous different and opposed forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and Žižek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title *The Speculative Turn*, the new currents of continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the center of debate in continental philosophy for decades to come.

*Critical Companion to Walt Whitman* Charles M. Oliver, 2005 Presents a complete reference to the life and works of Walt Whitman.

*PARADOXISM AND POSTMODERNISM* Ion Soare, For a better understanding of the aims of this essay it is necessary to recall, at least fugitively, the partial (in)adequacy of the notion and the term of postmodernism, what, in spite of the fact that it is recognized for quite a long time in the literature of specialty, still arouses controversies.

*Modernist Idealism* Michael J. Subialka, 2021 *Modernist Idealism* develops a framework for understanding modernist production as the artistic realization of philosophical concepts elaborated in German idealism.

Telematic Embrace Roy Ascott, 2003 *Annotation Telematic Embrace* combines a provocative collection of writings from 1964 to the present by the preeminent artist and art theoretician Roy Ascott, with a critical essay by Edward Shanken that situates Ascott's work within a history of ideas in art, technology, and philosophy.

**Critical Terms for Media Studies** W. J. T. Mitchell, Mark B. N. Hansen, 2010-03-15 *Communications, philosophy, film and video, digital culture: media studies* straddles an astounding array of fields and disciplines and produces a vocabulary that is in equal parts rigorous and intuitive. *Critical Terms for Media Studies* defines, and at times, redefines, what this new and hybrid area aims to do, illuminating the key concepts behind its liveliest debates and most dynamic topics. Part of a larger conversation that engages culture, technology, and politics, this exciting collection of essays explores our most critical language for dealing with the qualities and modes of contemporary media. Edited by two outstanding scholars in the field, W. J. T. Mitchell and Mark B. N. Hansen, the volume features works by a team of distinguished contributors. These essays, commissioned expressly for this volume, are organized into three interrelated groups: "Aesthetics" engages with terms that describe sensory experiences and judgments, "Technology" offers entry into a broad array of technological concepts, and "Society" opens up language describing the systems that allow a medium to function. A compelling reference work for the twenty-first century and the media that form our experience within it, *Critical Terms for Media Studies* will engage and deepen any reader's knowledge of one of our most important new fields.

Elements of Structural Syntax Lucien Tesnière, 2015-02-11 This volume appears now finally in English, sixty years after the death of its author, Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well. The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar (DG). Drawing examples from dozens of languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was advocating. *Islam and the Trajectory of Globalization* Louay M. Safi, 2021-10-18 The book examines the growing tension between social movements that embrace egalitarian and inclusivist views of national and global politics, most notably classical

liberalism, and those that advance social hierarchy and national exclusivism, such as neoliberalism, neoconservatism, and national populism. In exploring issues relating to tensions and conflicts around globalization, the book identifies historical patterns of convergence and divergence rooted in the monotheistic traditions, beginning with the ancient Israelites that dominated the Near East during the Axial age, through Islamic civilization, and finally by considering the idealism-realism tensions in modern times. One thing remained constant throughout the various historical stages that preceded our current moment of global convergence: a recurring tension between transcendental idealism and various forms of realism. Transcendental idealism, which prioritize egalitarian and universal values, pushed periodically against the forces of realism that privilege established law and power structure. Equipped with the idealism-realism framework, the book examines the consequences of European realism that justified the imperialistic venture into Africa, the Middle East, and Latin America in the name of liberation and liberalization. The ill-conceived strategy has, ironically, engendered the very dysfunctional societies that produce the waves of immigrants in constant motion from the South to the North, simultaneously as it fostered the social hierarchy that transfer external tensions into identity politics within the countries of the North. The book focuses particularly on the role played historically by Islamic rationalism in translating the monotheistic egalitarian outlook into the institutions of religious pluralism, legislative and legal autonomy, and scientific enterprise at the foundation of modern society. It concludes by shedding light on the significance of the Muslim presence in Western cultures as humanity draws slowly but consistently towards what we may come to recognize as the Global Age. The Shout Simon Armitage, 2012-06-05 Now in paperback, the powerful selected work of Simon Armitage, the most distinctive poetic voice of contemporary Britain. Simon Armitage is arguably the leading British poet of the past twenty years. His knowledge of the English just as they are (a gentleman farmer / living on reduced means, a cricketer's widow, / sowing a kitchen garden with sweet peas), his colloquial Yorkshire wit and eye for situational ironies, his ability to steal up on us with the surreal while capturing the ordinary speech of everyday life: these qualities place him at the forefront of British poetry today. This slim volume is the perfect introduction to his work for newcomers, or the ideal selection for longtime readers to keep on the bedside table.

*Writing Ground Zero* John Whittier Treat, 1995 Treat summarizes the Japanese contribution to such ongoing international debates as the crisis of modern ethics, the relationship of experience to memory, and the possibility of writing history. This Japanese perspective, he shows, both confirms and amends many of the assertions made in the West on the shift that the death camps and nuclear weapons have jointly signaled for the modern world and for the future.
